

The AMP HP 350 Buick cylinder head rebuild kit comes with everything needed to rebuild your heads with modern high performance parts with a larger intake valve.

The stock 350 comes with 1.875 intake and 1.550 exhaust valves.

This kit uses an oversize 1.94 intake valve to replace the 1.875

The stock 350 comes with a 1.550 exhaust valve. This kit comes with a 1.50 exhaust valve which is smaller but the instruction that comes with the kit explains how to actually increase the flow over the 1.550 valve.

Parts included

- 8 – 1.94 x 11/32 stainless steel,
swirl polished undercut stem intake valves
